

Helping you protect your assets, your reputation and your future.

TRUST ACCOUNT AUDITS

In the wake of recent events, Real Estate Agents are now under greater scrutiny from regulatory authorities, as well as the general public. As the threat of cybercrime attacks increases, the security of your client monies is critical to your business reputation.

How we can help

We can reduce the risk of cyber attacks and protect your business and reputation. In addition to issuing the compliance audit report, we will review your financial systems and current accounting practices to provide recommendations for improvement to your business.

We have a dedicated cyber security team who track pressing trends and assess the implications for our clients. Our team can conduct vulnerability testing, penetration testing, and assist you in preparing a security incident response plan. This will improve your level of preparedness in the event of an attack, and reduce the likelihood of loss to your business.
