One of the
RSM team

Building resilient, well-governed
and future-ready organizations.

Transformation creates opportunity. Strong governance turns it into sustainable value.

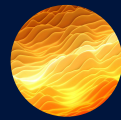

RSM helps organizations navigate complexity by integrating technology, governance, and risk management into a coherent operating model—supporting performance, accountability, and sustainable growth. Our integrated approach enables leaders to make confident decisions, manage emerging risks, and build resilient organizations for the future.

Digital, Data & Technology Transformation

We help organizations harness technology and data to improve performance, enable innovation, and build scalable, future-ready operations.

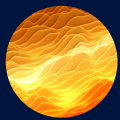

- Digital and IT transformation strategy
- Enterprise architecture and core systems transformation
- Systems integration and application lifecycle management
- Data governance, analytics, and AI enablement
- Cloud and infrastructure transformation
- Technology operating model and resilience

Governance, Sustainability & Compliance

We strengthen governance, sustainability, and compliance frameworks to support accountability, ethical leadership, and long-term value creation.

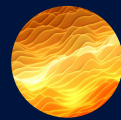

- Board and governance advisory
- Governance maturity assessment
- Sustainability strategy, reporting, and assurance readiness
- Compliance framework and regulatory readiness
- Regulatory and standards mapping
- Fraud, integrity, and ethics programs

Risk, Internal Control & Assurance

We strengthen risk management, internal control, and assurance capabilities to support informed decisions and operational resilience.

- Internal audit transformation, co-sourcing, and outsourcing
- Internal control and ICOFR advisory
- Enterprise risk management
- Risk and control analytics
- Business process and performance review
- Assurance program design and governance

Cybersecurity, Privacy & Technology Risk

We help organizations protect critical information assets, manage technology risks, and build trust in an increasingly connected environment.

- Cybersecurity governance and maturity assessment
- Cybersecurity assessment, testing, and incident response
- Data privacy and digital trust frameworks
- Privacy impact assessments and compliance advisory
- IT audit and technology risk management
- Information security management system design and implementation
