

The measures that matter to **Education**

€500 post-secondary education grant

Financial support for students may encourage participation in further education and help sustain enrolment levels.

Investment in educational facilities and resources

Continued investment in educational infrastructure, equipment and human resources may improve learning environments and service quality.

Enhanced support for tertiary students

Extended financial assistance for eligible students helps reduce barriers to higher education and may support student retention.

English-language schools relief

Accommodation used by students attending English-language schools will no longer be subject to the eco-contribution. This may support Malta's attractiveness as a destination for English-language learning.

Free public transport retained

Improved accessibility for students and employees may support attendance, recruitment and mobility.
