

The measures that matter to **Energy**

Stable energy prices retained

Government has reaffirmed its commitment to maintaining stable electricity, gas and fuel prices through continued subsidy support.

€75 million investment in the electricity network

Further investment in Malta's distribution infrastructure aims to improve network reliability and support future economic growth.

Renewable energy expansion

Progress continues towards Malta's renewable energy objectives through offshore wind studies, renewable energy projects and energy diversification initiatives.

Battery storage & grid resilience

Additional investment in battery storage systems is intended to strengthen security of supply and increase resilience within the national grid.

Interconnector & infrastructure projects

Ongoing work on the second interconnector and studies for additional international connections continue to support Malta's long-term energy security.
