RSM

Data Privacy & Protection (DPP) Service

Based on the Privacy by Design framework, our risk–based, multi–disciplinary DPP programme proactively embeds privacy in all business aspects — from IT systems to business practices and employee conduct.

PDPA COMPLIANCE ✓

Governance & Control	Policies & Implementation	Data Management & Analysis
• Privacy strategy & governance advisory • Gap analysis • Privacy impact assessment • Training & awareness • Data Protection Trustmark (DPTM) certification facilitation	• Privacy programme design & implementation • Third–party risk audit • Data breach notification & incident management	• Data inventory mapping & audit • Data analytics • Data erasure • Personally identifiable information (PII) discovery service • IT security controls audit

PII Discovery Service
Uncover any unencrypted PII, e.g. NRIC data stored in a document file or picture format in your backup storage media, and stay compliant with strict PDPA rules on data protection.

Recovery & Continuity

Achieve a secure, vigilant and resilient posture to address threats and recover from incidents early.

Business continuity planning including BCM audit preparation

Disaster recovery advisory & IT managed services (AvailEase)

Crisis management & incident response advisory

Digital forensics

Digital Forensics

Digital Trust supports law firms and business owners in forensic analysis to recover digital audit trails as evidence for formal investigations into areas such as industrial espionage, copyright infringement and fraud.
