Accounting services

Accounting Services

Our Accounting Services support Swiss organisations seeking reliable financial information, regulatory compliance and efficient financial operations in an increasingly complex environment.

Managing accounting obligations in Switzerland requires precision, structure and a strong understanding of local regulations and reporting standards. As organisations grow, expand internationally or operate across cantons, internal finance teams are often under pressure to deliver timely and accurate information while maintaining full compliance.

RSM Switzerland supports Swiss SMEs and mid-market organisations with outsourced accounting and financial management services that bring clarity, consistency and control. Our teams manage accounting processes efficiently, allowing management to focus on strategic decision making while retaining full visibility over financial performance.

Our structured delivery model ensures accurate bookkeeping, reliable closing cycles and high-quality financial reporting. We act as a trusted accounting partner, reducing administrative workload, improving process efficiency and strengthening financial governance.

Thanks to our strong local presence in Zurich, Geneva and Lausanne, our teams understand cantonal practices and Swiss regulatory requirements. As part of the RSM global network, we also support organisations operating internationally, combining solid local expertise with access to international reporting standards and specialised expertise.

Our services include:

- ✓ Outsourced accounting and bookkeeping
- ✓ General ledger and reconciliations
- ✓ Period-end and year-end closing
- ✓ Financial statements and management reporting
- ✓ Reporting under Swiss Code of Obligations, Swiss GAAP FER, IFRS and US GAAP
- ✓ Coordination with auditors and authorities
