

UNLEASHING VIETNAM'S CLEAN POWER POTENTIAL

Vietnam boasts the highest installed capacity of solar power in Southeast Asia, generating 16,500 MW at the end of 2020

One of the best wind resources in Southeast Asia, with an estimated potential of 311 GWs

8.6 percent of land area suitable for large wind farms

Solar PV systems provide roughly 10.6 TWh of electricity in 2020, accounting for nearly 4 percent of total output

Within the **top 10 countries with the highest capacity of solar energy installed** in 2020

Over 39% of area has annual average wind speed over 6m/s, corresponding to wind resources potential of 512 GWs

Solar PV capacity increased from **86 MW in 2018 to about 16,500 MW in 2020**

Rooftop solar will contribute **about 50% of Vietnam's total solar capacity in 2030**
